Summary

Oracle Database Administrator with 2+ years of experience managing 75+ Oracle databases in a production environment. Skilled in database administration, RAC, ASM, Data Guard, backup and recovery, and automation. Hands-on experience with Oracle Cloud Infrastructure (OCI) and monitoring tools. Oracle-certified with a strong focus on high availability and disaster recovery.

Experience

System Engineer August 2024 – Present

Tata Consultancy Services *Noida, Uttar Pradesh, India*

- Managed 75+ Oracle Database 19c instances across RAC and standalone environments, maintaining availability and performance for business-critical applications.
- Configured and monitored ASM diskgroups and RAC clusters using Datadog, reducing incident response time by 40% and maintaining 99.9% uptime.
- Wrote bash scripts to automate RAC/ASM health checks and backup routines, reducing manual effort by 50%.
- Carried out database patching, version upgrades on Oracle Cloud Infrastructure (OCI) with minimal downtime.
- Investigated production incidents involving RAC node evictions and ASM disk failures, identified root causes, and applied fixes that reduced repeat issues by 60%.
- Handled backup and recovery operations using RMAN and Data Pump, including Data Guard switchover/failover drills to support business continuity.
- Wrote and maintained technical documentation covering patching procedures, runbooks, and operational best practices.

Education

Bachelor of Technology, Electronics and Communication Engineering October 2020 – June 2024

KMEA Engineering College *Cochin, India*

- Published research: *Deep Learning Approaches for Waste Classification* – built CNN models for automated waste sorting.
- Coursework: Signal Processing, Digital Electronics, Microprocessors & Microcontrollers, Communication Systems, Embedded Systems.

Technical Skills

Databases: Oracle Database 19c, RAC, ASM, Data Guard, SQL, Performance Tuning, Backup & Recovery

Cloud: Oracle Cloud Infrastructure (OCI)

Programming: SQL, Shell Scripting, Python (basic)

Tools: Datadog, Oracle Enterprise Manager (OEM), SQL Developer, RMAN, Data Pump

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – Oracle, 2025
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate – Oracle, 2025

Research & Publications

Deep Learning Approaches for Waste Classification 2024

Published Research Paper

- Built CNN-based deep learning models to classify waste as recyclable or non-recyclable with 92% accuracy.
- Applied transfer learning and image preprocessing techniques to improve model performance on limited training data.
- Demonstrated a practical AI application in environmental waste management.
